Know Your Data with EncompaaS

EncompaaS enables organisations to gain complete visibility into their data, accelerating the time to information value, uncovering business insights, and driving competitive advantage.

EncompaaS transforms information management by:

✔ Using next-generation AI technologies to find, enrich, organise and de-risk **structured**, **unstructured** and **semi-structured content** anywhere in the enterprise.

✔ Generating the highest quality, normalised data which can be leveraged for advanced analytics to fully understand where information is located.

✔ Accelerating time to information value, identifying key areas of interest, risk or opportunity within your data corpus.

What You Do Know
> Name   > File Type   > Created by
> Date Created   > Where It's Saved
> Metadata that the author added

What You Don't Know
> What type of document is it?

> Which team or business unit is responsible for this document?

> Does the document include any business critical information that I need to be aware of?

> If so, how can I use this at scale to further advance my business goals?

> How sensitive is it?

> Does this contain any inherent risk?

> Prepare today to respond to the questions that might arise tomorrow

There is a direct link between the success of incorporating Generative AI outputs and the quality, clarity, and relevancy of your existing data inputs."

Jaimie Tilbrook – CPO, EncompaaS

ENCOMPAAS

EncompaaS Information Management Pillars

The EncompaaS platform manages all organisational data – across the cloud, on-premises or hybrid environments - through our four pillars of information management.

Discover
Know what you have in any repository, anywhere in the enterprise, including structured, semi-structured and unstructured assets like text, audio, images, and video.

Understanding
Understand your data and get answers from it quickly. Metadata is added automatically to enrich information, transforming it into an invaluable asset for your organisation.

Govern
Govern and protect information and the enterprise at large. Automated policies manage information in place, in real time and at scale.

Use
Transform information into business success with the power to drive AI investments like ChatGPT and Azure OpenAI.

EncompaaS Platform Benefits

Increased Operational Efficiency

Automate the discovery and classification of all organisation data to streamline and automate processes, optimise data management efforts, and accelerate time-to-value for data-driven initiatives.

Improve Decision-Making

Gain a comprehensive understanding of your organisation's data landscape, so you can make more informed and data-driven decisions.

Identify PI and Sensitive Information

Automate the detection of personally identifiable and sensitive information to enhance data protection, streamline compliance, and reduce risk. Ensure critical data is securely managed and protected.

Facilitate Digital Transformation

Leverage unparalleled data quality to fuel upstream processes and decisions, such as the adoption of Generative AI tools like GPT.
